U. S. DEPARTMENT OF AGRICULTURE,

OFFICE OF EXPERIMENT STATIONS.

CIRCULAR NO. 16.

SIR:

The Office of Experiment Stations issues two classes of publications for general distribution. The first consists of Farmers' Bulletins, which are brief, popular in character, issued in large editions, and intended for wide circulation. They are sent to all persons who apply for them.

The second class consists of Experiment Station Bulletins and the Experiment Station Record. The Experiment Station Bulletins are more or less technical, and especially intended for station workers and others interested in the science of agriculture. The Experiment Station Record, which is also technical in character, is a periodical, designed to furnish information of current work in the various stations, agricultural colleges, etc. As the publications of this class are issued in small editions, great care is necessary in their distribution. It is the practice to send to persons applying for them one or more numbers, from which they may judge of their usefulness, but not to place any names upon our mailing list until after receipt of a special application, the form for which accompanies this circular.

Your name has been placed upon the list of those to whom Farmers' Bulletins will be sent.

A. C. True

Director.

Application for Technical Publications of the Office of Experiment Stations.

Having received a copy of one of the Experiment Station Bulletins or of the Experiment Station Record, I have examined the same and, judging that the publications of its class will be of use to me, I request that my name be placed upon the mailing list of the Office to receive future issues.
